

MOTHER KIDNAPS LITTLE DAUGHTER

Takes Her From Convent and
Disappears in Auto-
mobile.

[Special to The Times-Dispatch.]
Atlantic City, N. J., March 21.—W. Preston Nuckols, wealthy race-track man and plunger, announced today that his wife, who was recently divorced from him, had kidnapped his youngest child, Muriel, four years old, known affectionately as "Tiddle-dee-winks."

Under the arrangement reached by the lawyers and the vice-chancellor at the time the divorce decision was given adverse to Mrs. Nuckols, the two children, Muriel and Preston, were placed in a Catholic institution at Merion, Pa. Mrs. Nuckols was granted the right to see the children at stated intervals.

On Saturday Mrs. Nuckols obtained entry to the convent to visit her children. She had eloped "Tiddle-dee-winks" in her arms, and before the sisters could interfere the spy young mother had sealed the convent wall with the little girl.

Half a block away a long gray racing car was waiting, and a young society man, who has been reported as very attentive to Mrs. Nuckols, was at the wheel. The woman leaped into the machine, and while the alarm was being given from the convent the driver threw on the high speed clutch and the machine was lost in a cloud of dust down the Merion highway.

Detectives have been unable to get any trace of the fugitives. The father is frantic with anxiety and expresses the fear that he may never see the child again.

A close guard is being kept over Preston, the other child, who is being watched as carefully as the McLean baby in Washington to prevent any attempt to repeat the dashing kidnapping of Muriel.

Nuckols declares he will spend his millions to recover "Tiddle-dee-winks," but his lawyers are not at all confident that she can be recovered.

Vast Estate.

[Special Cable to The Times-Dispatch.]
London, March 21.—Armand De Lamar, once a Cuban rough rider with Buffalo Bill's show, has suddenly become a multimillionaire. He received the news through an advertisement which appeared in a London theatrical paper. A letter was waiting for him at the stage office from his mother, informing him that he was heir to a sixth of his grandfather's estate, the whole amounting to \$15,000,000.

This estate had been in the hands of the Cuban government, who after a long search found that the old planter's next of kin were the De Lamas living in New York.

Mrs. De Lamar has gone to Havana to claim the estate, which is to be divided among her children, of whom Armand is the eldest. He is leaving in a few days to join his mother in Cuba.

RAILROADS OPEN THEIR SIDE OF CASE

Claim That Employees Do Not
Expect Demands to Be
Granted.

[Special to The Times-Dispatch.]
New York, March 21.—The West for the railroads was opened to-day at the meeting of the arbitration board appointed under the Erdman act to settle the differences between the fifty-four Eastern roads and the firemen and engine-men employed thereon. Elisha Lee, chairman of the conference committee of managers, who represented the roads, declared that the employees of railroads had made their large demands knowing that they would not be granted, but expecting to be favored when the matter was arbitrated.

"Railroad employees have come to know that a strike which would tie up traffic is well-nigh unthinkable," he said. "They know that if the strike does not take place, the railroads must give way. The men make large demands, believing that arbitration must take place and that in the end the splitting of the difference between what they demand and what the railroads offer will result in their favor."

The roads, Mr. Lee said, appeared before the arbitration board with proposals built up by private capital, yet unable to control the price at which they sell their transportation, not having the privilege of getting in the cheapest market the labor for that product.

He instanced the State laws that required extensive outlays for grade crossings, etc., which he said cost the Pennsylvania alone \$600,000, the extra crew bill, pending in this State, would cost the New York Central \$200,000 a year, he claimed.

William H. Holbrook, foreman of engines for the Pennsylvania Western lines, testified that the firemen's work is made easy by automatic stokers. Firemen, he said, did not do any more work now than they did in 1902.

Willoughby-Kendall.

[Special to The Times-Dispatch.]
Fredericksburg, Va., March 21.—

Samuel H. Willoughby and Miss Annie P. Kendall, both of this city, were married at the Methodist parsonage, Rev. J. R. Jacobs performing the ceremony.

BIG GAME HUNTER BACK

Brings Home Bit of Advice and "Cure" for Hunched Nerves.

[Special to The Times-Dispatch.]
New York, March 21.—Kenyon Painter, big game hunter, sportsman and naturalist of Cleveland, Ohio, has returned from an eight months' big game hunt in Central East Africa. In addition to a great number of trophies and birds he brings with him a bit of first-hand advice and a "cure" for racked nerves.

"I tell you," he said to-day, "for bringing a man back to a natural state of health, for clearing the cobwebs from a city man's brain and the mist from his eyes, there is nothing like a stay in the forests of East Africa. The climate is superb, and after you have tramped for a month or two, or ridden a mule until you feel you have become part of him, and above all, enjoyed life in the open---day and night--

well then you begin to feel that you are really living and you revert to a state of natural primitive health."

Mr. Painter brought back a very valuable parrot. As yet the bird has not acquired a very deep knowledge of the English language. He spoke some native words, but, as Mr. Painter laughingly explained, "I better not translate them to you, you might put them in the paper and--well, I have to live in Cleveland you know."
